The Small Business Profiles are produced by the US Small Business Administration's Office of Advocacy. Each report incorporates the most up-to-date government data to present a unique snapshot of small businesses. Small businesses are defined for this profile as firms employing fewer than 500 employees. Net small business job change, minority small business ownership, and exporter share statistics are based on the 2015 Statistics of US Businesses (SUSB), 2012 Survey of Business Owners (SBO), and 2015 International Trade Administration (ITA) data, respectively.

EMPLOYER BUSINESS OWNER DEMOGRAPHICS

TURNOVER AMONG ESTABLISHMENTS WITH EMPLOYEES

Figure 3: Maryland Quarterly Startups and Exits

- In the third quarter of 2016, 3,703 establishments started up, generating 12,809 new jobs in Maryland. Startups are counted when business establishments hire at least one employee for the first time. (Source: BDM)
- In the same period, 3,889 establishments exited resulting in 12,955 jobs lost. Exits occur when establishments go from having at least one employee to having none, and then remain closed for at least one year. (Source: BDM)
- Figure 3 displays quarterly startups and exits from 1992 to 2016. Each series is smoothed across multiple quarters to highlight long-run trends. (Source: BDM)

The BLS data covers only business establishments with employees. BLS refers to startups as births and exits as deaths. These terms are distinct from the BLS openings and closings categories. Openings include seasonal re-openings and closings include seasonal shutterings. Quarterly startup and exit values may not align with Figure 3 due to smoothing.
